The densest element yet known, Pelosium, has one neutron, 12 assistant neutrons, 75 deputy neutrons, and 224 assistant deputy neutrons, giving it an atomic mass of 311. The particles are held together by dark forces called morons that are surrounded by dark quorities called lepton-like particles called peons. Pelosium's symbol is PU. Pelosium's mass increases over time as morons randomly interact with various elements in the atmosphere leading to the formation of isodopes. The trait of moron-promotion leads scientists to believe Pelosium is formed when morons reach a certain quantity in concentration. to conquer and enslave the world. They're actually pretty open about it.

We are on the verge of a global transformation All we need is the right major crisis and the nations will accept the development. This 40 chapter document is designed as a philosophy to bring human beings across the globe under the full control of a narrow group of elite. It elevates Nature above Mankind, and contains a little ditty called 'The Precautionary Principle' where you are guilty until proven innocent.

Here are a few of Agenda 21's objectives:

- The end of Nation Sovereignty
- The abolition of private property
- The restructuring of the family unit
- Increasing restrictions and limitations on mobility and opportunity
- Human beings are to be concentrated into 'Human Settlement Zones'
- Irrigation - Unsustainable - Gone
- Grazing of Livestock - Unsustainable - Gone
- Farmlands - Unsustainable - Gone
